

National Case Management Week

October 12–18 | Guiding Journeys

Celebrating Those Who Guide *Every Step of the Way.*

At Arosa, we see the heart behind what you do every day. You are the bridge between hospital and home—the steady guide who ensures every patient has the safest, **most supported path forward**. This week, and always, we celebrate your dedication, your compassion, and your unwavering commitment to the people you serve.

Continuing the Journey, *Together.*

When your patients are ready to leave your care, we're here to help them arrive home safely—**supported, prepared, and surrounded by care**. Through Arosa's **integrated Care Management and In-Home Caregiving model**, we work alongside you to:

-  Ensure **smooth home transitions** for patients with complex needs.
-  Coordinate **medications**, follow-ups, and safety checks.
-  **Support family caregivers** and provide respite when needed.
-  Deliver compassionate, **skilled Care Managers and Caregivers** who carry out your discharge plan at home.

We're proud to continue the work you start—**helping your patients thrive after discharge**.

To every case manager who guides patients toward recovery and independence—thank you.

Your work changes lives, and we're honored to walk beside you in that journey. Let's continue to guide journeys home, together.

Why Hospital Case Managers *Choose Arosa.*

-  We're care professionals first, grounded in **empathy and advocacy**.
-  Our Care Managers (RN, LCSW, CCM) **collaborate with your team** to close care gaps.
-  We're **available 24/7** for discharge coordination and urgent transitions.
-  Our private-pay services complement your efforts—**extending support beyond the hospital setting**.
-  We help **reduce readmissions** and increase patient satisfaction.

**Your Partner in Care Management
and In-Home Caregiving Support**
